How to Set Weekly Page Goal

1. Choose a "Just Right" book. Click here for how to do that.
2. Set a timer for 10 minutes. Note which page number you begin reading. Read for 10 minutes. Count how many pages you read in 10 minutes.
3. Look at the chart below and find out how many minutes you are required to read each week (7 days--both in school and out of school reading counts):

Class	# minutes required to read each week
English 9	90
9 Honors	120
English 10	100
10 Honors	120
English 11	120
AP Literature	160
English 12 College Prep and Career Prep	140
AP Language (Comp)	160

4. Multiply the number of pages you read (see Step #2) by 10 if you have to read 100 minutes per week.
Example: I read 12 pages X 10=120 pages per week is my Weekly Page Goal.

If you are required to read 120 pages per week, multiply the number of pages you read (see Step #2) by 12. Example: I read 13 pages X 12 = 156 pages per week is my Weekly Page Goal.

5. Do the math above on a piece of paper and turn it into your teacher so he/she can input your Weekly Page Goal onto the class Reading Log.
